

- RESTASIS[®] is a true prescription therapy for dry eye due to decreased tear production.
- RESTASIS[®], unlike artificial tears, can help you produce more of your own tears.
- While waiting for the benefits of RESTASIS[®] to begin, you are encouraged to continue use of REFRESH[®] Brand Tears, as frequently as needed.
- Continued use of RESTASIS[®] may help decrease the need for artificial tears over time.
- The most common side effect with RESTASIS[®] is a burning sensation.

Use as follows: 1 drop in each eye twice daily. Follow all of your Doctor's instructions.

RESTASIS[®] helps your eyes increase tear production which may be reduced by inflammation on the eye surface in Chronic Dry Eye. This increased tear production was not seen in patients using topical steroid drops or tear duct plugs.

See important safety information on back.

What to expect from treatment.

- It is typical to see significant improvement in tear production within the first month. Improvement will gradually build at first, so be assured that RESTASIS[®] is working. To continue producing your own tears, you must continue using RESTASIS[®]. DO NOT DISCONTINUE USE WITHOUT CONSULTING YOUR DOCTOR!
- Many patients on RESTASIS[®] return to see their doctor after a full 2 to 3 months of using RESTASIS[®] twice daily.
- Remember, dry eye due to decreased tear production is a chronic disease, so treating it requires your long-term commitment—and that means taking your RESTASIS[®] every day!

Full prescribing information has been provided to your doctor.

Important Safety Information
